

A flexible, short-term Wi-Fi Service

Wi-Fi on demand. When you want, for as long as you want.

In today's business world almost no professional gathering takes place without the aid of wireless communications.

Whether it be for training, temporary office space, a hotel seminar or an outdoor event, all require communications that can be deployed quickly and maintained as long as necessary.

There is no *one-size-fits-all* to provide a great Wi-Fi experience.

Every location, event or conference has its own purpose.

Delegates have varied communication needs and each venue offers a different environment.

Whatever the need or the type of location, most attendees will expect reliable, consistent Wi-Fi. AirTime is an on-demand wireless service. AirTime is customised and enabled to meet your specific needs.

Why AirTime?

For situations that rely on good communications, a poor user experience can detract from your message, your event, your brand. Wireless coverage ; actual performance and ease of use is just as important to user experience.

At any one event, smartphones, laptops and tablets are simultaneously enabled to access event applications, check email (and download attachments), browse the web, tweet and generate photo uploads. The existing Wi-Fi at a chosen location may not deliver to the expectations of you or your delegates.

For example, Hotel Wi-Fi is often adequate for a handful of connected smartphones in the bar but it is perhaps not designed for 100 delegates in a coffee break simultaneously trying to check their email and download content. 100 delegates that may equate to over 200 individual devices connecting to the Wi-Fi: smartphones, laptops and tablets. Is the wireless network ready for that?

What we need

So we can understand the event and provide a solution that meets your requirements:

1. A consultation.
2. A brief site inspection.
3. Site contact. If we are integrating into an existing network (a hotel for example) we will need to discuss a few technical details with them and understand any limitations to preferred deployment locations.
4. If the site is considered complex: a floor plan of the required coverage area if indoors and/or photos of the proposed environment.

Pricing:

A minimum contract of just one day.

Airtime comes as either a Standard or Premium Service. The Premium offers greater levels of customisation where Standard encompasses the most common Wi-Fi requirements already in the offering.

Standard AirTime Service:

Pricing begins with a daily, per connected-device rate.

Often, 10 users may mean 20 - 30 connected Wi-Fi enabled devices.

Standard services duration and volume	1-20 Devices	21-60 Devices	61-100 Devices	101+ Devices
1 day	\$9 per device	\$12 per device	\$13 per device	POA
1 week	\$8 per device	\$16 per device	\$13 per device	POA
1 month	\$7 per device	\$13 per device	\$10 per device	POA
3 months	POA	POA	POA	POA
6 months	POA	POA	POA	POA

Premium AirTime Service:

The Premium service offers a fully customised service configuration that can among other things, can support:

- Multiple site locations
- Complex security (for example Active Directory and RADIUS authentication)
- Complex Quality of Service (for example Voice over Wireless support)
- Insightful Reporting

Any premium service is fully customised and is quoted Price on Application (POA).

When you can use AirTime:

- Training
- Temporary office relocations
- Office extensions
- Conferences
- Tradeshows
- Temporary campuses
- Emergency meetings
- Festivals
- Wi-Fi for Guests/Visitors
- Wireless Security Cameras

Terms & Conditions:

- AirTime pricing is based on number of users, event duration and if using cellular backhaul, the data used.
- The one-off fee for any selected Standard Service item above is \$355. This includes pre-staging the equipment, configuration, assembly and installation, insurance, disassembly and transport of AirTime.
- Premium service may incur additional charges depending on the level of complexity and time involved.
- If an Internet connection is not available at the location of service and is to be provided by Netbridge, a mobile broadband solution is recommended. Data usage is charged per Gigabyte (GB) as per the following:
 - o Auckland, Wellington, Christchurch, Queenstown: \$20 per 1 Gigabyte (GB)
 - o Rest of New Zealand: \$29 per 1GB
- Environmental or physical surroundings can impact wireless signals. AirTime performance is subject to wireless interference at any particular location. While every effort is made to ensure an excellent service and experience, Netbridge cannot be held responsible for activities that impact on the service that are outside of our control.
- Coverage, functionality and performance can be scaled up or down depending on changing requirements. Changes to the system can be made at any time.

Payment:

For contracts of 1 week or less, payment is required in advance.

For contracts of more than 1 week, a deposit of 10% is required to reserve the infrastructure for your event. For cancellations, Netbridge is able to refund all deposits if notified up to 48 hours before the event (usually this is when we begin to configure and prepare equipment for the event).

Deposits and payments can be made to our account listed below. We will provide a reference to place on the transaction.

At this time we cannot accept payment by credit card. We apologise for any inconvenience this may cause.

Activation Time:

Following receipt of all required information, we can deploy in as little as 48 hours.

Wellington 48 hours

Auckland-Christchurch-Hamilton-Dunedin-Queenstown 72 hours

Other NZ locations **POA**

Technical Assistance:

A Netbridge engineer will configure the equipment to specification, install AirTime and test the service. An engineer will be on-call throughout the service, from 8am to 8pm on weekdays and from 9am to 9pm on weekends.
